NEURONES confirms its revenues announced last July, on the rise over the first half-year (+ 19%, of which 16.5% with constant structures).

Business operating profit (\*) rocketed by 36%, at 8.8%.

This new profitability increase was due to the impact of volumes and improved management parameters (regarding the rate of billable employees, in particular). Consequently, operating margin, after inclusion of expenses related to stock options and free shares (0.6%), amounted to 8.2%. This first half-year is a record performance over the last six years.

## Outlook

NEURONES confirms its expected 2008 revenues (at around €179 million) and operating margin (between 8% and 9%), further corroborated by its business facing no downturns.

(\*) before inclusion of expenses related to stock options, free shares and depreciation of assets.
